BALANCED PLATE METHOD FOR INDIAN MEALS

"Enjoy the taste of eating right."

Simran Suri

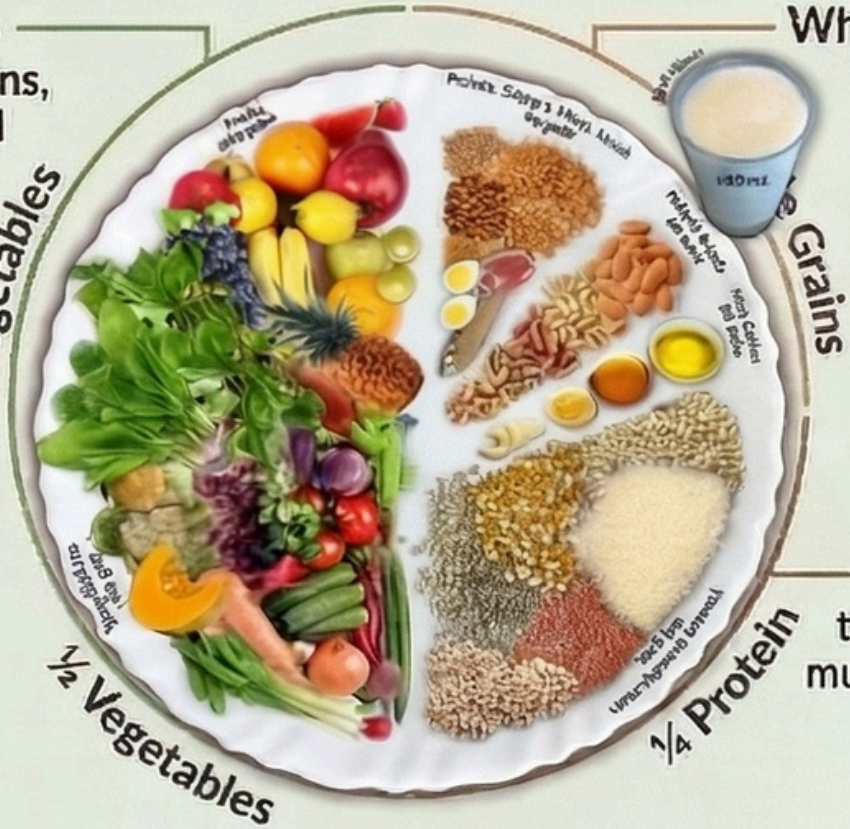
Clinical Dietitian & Nutrition Consultant

HOW TO BUILD A BALANCED PLATE

A balanced diet provides calories, protein, vitamins, minerals and fibre needed for good health. No single food contains all nutrients, which is why meals should include a variety of food groups.

Vegetables
Fibre, vitamins, minerals and minerals for digestion, immunity

Whole Grains
Sustained energy fuel



Protein
tissue repair, muscle health, immunity

VEGETABLES

- Spinach
- Bhindi
- Carrots
- Beans
- Cabbage
- Broccoli
- Tomato

WHOLE GRAINS

- Chapati/Roti
- Brown Rice
- Millets
- Oats
- Quinoa

PROTEIN

- Dal
- Rajma
- Chickpeas
- Paneer
- Tofu
- Chicken
- Fish

HEALTHY LIFESTYLE HABITS

- Include vegetables in most meals
- combine carbohydrates with protein
- healthy fat selection water
- mindful-chewing and slow-eating
- preparing simple, varied home meals

FINAL NOTE

Balanced nutrition is not about strict diating or perfection. It is about building sustainable habits and understanding your body's needs. Encourage readers to consult a qualified dietitian for personalised guidance.
